- 4 **The final lockdown**  
The Government's highly successful vaccines policy has now led to pressure to open up the economy. Yet that will lead to increasing the spread of the COVID virus again. And the more it spreads the larger the number of variants which eventually may be resistant to existing vaccines, which will land us back to square one. If schools are to be the priority in easing restrictions, other areas of society, like the economy, will have to remain in lockdown for longer.
